Subject : Redundant & combination of qualification which are affecting our recruitment.

Respected Sir,

This has reference to the letter received from your esteemed office vide file No. DDN/R&P/MOU COMMITTEE/2015 dated 28/01/2015 to submit suggestion on the above issue. We are quoting the qualification that need to be relooked and be incorporated in our R&P which have been effecting our recruitment for the past two to three years.

- 1. Pharmacists:** (Allopathic & Homeopathic) qualification quoted three years diploma in pharmacy, whereas available qualification is two years +750 hrs of internship, which is equivalent to all, three years technical diploma. Diploma in Homeopathy is not available in our education system, should be completely dispensed with.
- 2. Boiler operator:** At A2 level qualification quoted for recruitment is three years diploma with first class boiler proficiency certificate. This need to be dispensed with as no individual pursues boiler qualification after having acquired a Diploma. Moreover initially he has to acquire IInd class boiler proficiency certificate then after putting up three years experience in boiler operations he became eligible to apply for the 1st Class certificate, hence such candidates are not available in the market. Boiler operators should be recruited at JAT level i.e. A1 with ITI & second class Boiler proficiency certificate.
