Subject: Conceiving unsafe and inconvenient working condition due to recently issued Fire Retardant Dungarees.

Respected Sir,

Kits & Liveries have always remained a constant source of constraint and a disputed issue mainly due to its supply backlog or poor quality, which we are striving hard to overcome in coordination with the local management.

Presently we have been receiving complains about the fire retardant dungaree mainly for the inconvenience of its size and not suitable to working conditions, the hot environment in rigs, platforms and otherwise climatic conditions when temperatures run normally beyond 40degree in summer season makes it impossible to work with, thus conceiving unsafe work environment.

The material is not suitable for welders, with the sparks holes are formed burning the skin, neither their cloth and stitching is of good quality as they are getting torn within six months of use.

More over only one dungaree is issued per year this also creates lot of inconvenience as it is not washed daily due to long hours of work and when one is exposed to double duty, which leads to unhygienic practice.

It is earnestly requested that proper alternative may please be worked out, to be stitched to individuals size making work more comfortable, atleast two dungarees be issued per year and purchase may be decentralized so that in case the dungaree is off size can be rectified an restitched.

When success is still a long way, we are happy that we have marched together to a distance from where we can feel the light on the other side of the tunnel mainly because of the safety shoes supplied in WOU for the last two years. We appreciate the make (Liberty) and quality of the shoes, they run very well through the conditions in the field throughout the year, this is as per findings of our employees in Plants and Offshore.

We hope that the areas where we are lagging i.e. timely procurement of other items also materialize in terms with presently supplied safety shoes. We once again request your esteemed authority to review the issue of Fire Retardant Dungaree.

With regards,

Thanking you,

Yours faithfully,

(Pradeep Mayekar)
General Secretary
